```
(Adapted from documentation provided by BYU Office of Information
Technology)
Description
This service provides information about control dates. Controls
dates are used to manage events in the system and mark boundaries
for different types of activities. For example, if I wanted to know
what the registration boundary was for specific semester or term I
would look at the REGISTRATION control date for that year term. The
start and end dates in that record would mark the beginning and
ending of registration for that semester or term. The same applies
to identifying the first day of class (CURRICULUM), when the class
schedule for a given semester becomes visible to the public
(PUBLIC VIEW), etc.
Author
Bill Cope, OIT Core Services.
Date Created : Last Changed
March 7, 2011 : March 9, 2016.
Authentication
This is public information; therefore it does NOT require
authentication.
Authorization
This is public information; therefore it does NOT require
authorization.
Usage
BASE URI:
https://ws.byu.edu/rest/v1/academic/controls/controldatesws
Options (following base URI):
/{output-format}/{date-clarifier}[/{year-term-code|date-
range | date | ] / {date-request-type } [ , {date-request-type } , {date-request-
type \... ]
OPTIONS:
{output-format} is xml or json. If this option is omitted, xml is
returned.
{date-clarifier} is one of:
        all - [no following date required; returns all available
semesters past and future]
        range - next option must be {date-range}, eg. 20161,20165
        yearterm - next option must be {year-term-code}, eg. 20163
        asofdate - next option must be {date}, eg. 20160307
        registration - gives currently available registration dates
for all available semesters past and future
        {year-term-code} is YYYYN
        Where N is one of:
        1 = Winter
        3 = Spring
        4 = Summer
        5 = Fall
  e.g., 20161 is Winter 2016
        {date-range} is {year-term-code}, {year-term-code}; eg.
20161,20165
        {date} format is YYYYMMDD, where YYYY is the full year, MM
is the month and DD is the day. July 4, 2011 would be represented as
20110704 (need to include leading zeros for day or month when less
than 10).
{date-request-type} is one of:
        class_dates - 1st day of class to last day of class
        final dates - 1st day of finals to last day of finals
        curriculum - Year terms for admissions (no gap like
<strike>curriculum</strike> semester)
        current yyt - day after prev finals to last day of finals, 4
yrt
        semester - 1st day of cls to last day of finals
        registration - First date registration opens through add
deadline for the term
        public_view - first date class schedule is visible for this
semester
        class block1 - 1st day of block 1 to last day of block 1
(note: encode space as %20)
        class block2 - 1st day of block 2 to last day of block 2
(note: encode space as %20)
        class dates sprummer - 1st day of class to last day of class
for spring or summer term (note: encode spaces as %20--
class%20dates%20sprummer)
        final_dates_sprummer - 1st day of finals to last day of
finals for spring or summer term
Examples:
Return First and last days of class for Winter 2016, as json:
https://ws.byu.edu/rest/v1/academic/controls/controldatesws/json/yea
rterm/20161/class dates
Return First and last days of finals for Winter 2016, as json:
https://ws.byu.edu/rest/v1/academic/controls/controldatesws/json/yea
rterm/20161/final_dates
Given current date, return information for current year term, as
https://ws.byu.edu/rest/v1/academic/controls/controldatesws/xml/asof
date/20160307/current_yyt
Return curriculum and semester dates for all terms in 2016, as xml:
https://ws.byu.edu/rest/v1/academic/controls/controldatesws/xml/rang
e/20161,20165/curriculum,semester
Return curriculum dates for all years and terms since 1900, as json:
https://ws.byu.edu/rest/v1/academic/controls/controldatesws/json/all
/curriculum
Returns the data for the curriculum, final_dates, class_dates and
semester control dates that are/were in effect as of March 8, 2016,
as xml:
https://ws.byu.edu/rest/v1/academic/controls/controldatesws/xm1/asof
date/20160308/curriculum, final dates, class dates, semester
Output
XML output schema for all XML control date requests. If more than
one date type is returned then the output would have multiple
<date row> entries. To view sample output, use XML test cases above.
<ControlDatesWSService xsi:schemaLocation="uri:</pre>
[location]/service.xsd">
 <request>
  <method>
  <resource>
  <attributes>
  <status>
  <statusMessage>
 </request>
 <response>
  <request_count>
  <date_list>
   <date_row>
    <date_type>
    <year_term>
    <start_date>
    <end date>
    <description>
   </date_row>
  </date list>
 </response>
</ControlDatesWSService>
JSON output schema for JSON control date requests. if more than one
date type request is returned then the output would have multiple
arrays within the date_list entry. To view sample output, use json
test cases above.

Support Info
Office of Information Technology
The Support Contact listed below will provide information about how
to use the web service, how to get access to the web service, and
can confirm the proper operation of the web service. Support is
provided: 24x7 for production down issues; 8:00 AM - 5:00 PM MST, M-
F, Holidays Excluded for new consumer assistance.
Primary Support Contact:
Name: Office of IT
Office Phone: 801-422-4000
E-mail: it@byu.edu
Collaboration Contact(s):
Name: Bill Cope
Office Phone: 801-420-1684
E-mail: bill cope@byu.edu
