# Error codes

When transforming the program in a standalone application, any error code has this form:

```
error number code,line number, column number, suggestion
```

Error code example

These are the error typical error code meanings:

- 1 **Handler**: Running low on memory, script aborted
- 2 **recursionLimit**: Recursion limit reached
- 3 **abs**: error in source expression
- 4 **accept**: bad expression
- 5 **aclip**: playLoudness is not an integer
- 6 **acos**: error in source expression
- 7 **acos**: domain error
- 8 **add**: error in matrix operation
- 9 **add**: destination has a bad format (numeric?)
- 10 **add**: error in source expression
- 11 **add**: can't set destination
- 12 **add**: can't add array to scalar
- 13 **aliasReference**: error in file expression
- 14 **Operators and**: and: error in left operand
- 15 **Operators and**: and: error in right operand
- 16 **Operators bitAnd**: bitAnd: error in left operand
- 17 **Operators bitAnd**: bitAnd: error in right operand
- 18 **annuity**: error in period expression
- 19 **annuity**: error in rate expression
- 20 **answer**: error in question expression
- 21 **answer**: error in response expression
- 22 **answer**: error in title expression
- 23 **split**: error in expression
- 24 **arrowKey**: error in direction expression
- 25 **arrowKey**: not a direction
- 26 **asin**: error in source expression
- 27 **asin**: domain error
- 28 **ask**: error in question expression
- 29 **ask**: error in reply expression
- 30 **ask**: error in title expression

- 31 **atan2**: error in first expression
- 32 **atan2**: error in second expression
- 33 **atan2**: domain error
- 34 **atan**: error in source expression
- 35 **atan**: domain error
- 36 **average**: error in source expression
- 37 **base64Decode**: error in source expression
- 38 **base64Encode**: error in source expression
- 39 **baseConvert**: bad destination base
- 40 **baseConvert**: error in source expression
- 41 **baseConvert**: bad source base
- 42 **baseConvert**: can't convert this number
- 43 **baseConvert**: destination is not base 10
- 44 **beep**: error in expression
- 45 **binaryDecode**: destination is not a variable
- 46 **binaryDecode**: invalid data for parameter
- 47 **binaryDecode**: not enough parameters
- 48 **binaryDecode**: error in source expression
- 49 **binaryEncode**: invalid data for parameter
- 50 **binaryEncode**: not enough parameters
- 51 **binaryEncode**: error in source expression
- 52 **Button**: bad accelerator modifier
- 53 **Button**: family is not an integer
- 54 **Button**: menuButton is not an integer
- 55 **Button**: menuHistory is not an integer
- 56 **Button**: menuLines is not an integer
- 57 **Button**: mnemonic is not an integer
- 58 **cancel**: message id is not an integer
- 59 **charToNum**: error in source expression
- 60 **choose**: error in expression
- 61 **choose**: not a tool
- 62 **Chunk**: error in background expression
- 63 **Chunk**: error in card expression
- 64 **Chunk**: error in character range
- 65 **Chunk**: container is not a button or field
- 66 **Chunk**: error in chunk expression
- 67 **Chunk**: error in item range
- 68 **Chunk**: error in line range

- 69 **Chunk**: error in object expression
- 70 **Chunk**: error in range end expression
- 71 **Chunk**: error in range start expression
- 72 **Chunk**: error in stack expression
- 73 **Chunk**: error in text string
- 74 **Chunk**: can't separate tokens
- 75 **Chunk**: can't separate words
- 76 **Chunk**: can't delete object
- 77 **Chunk**: can't find object
- 78 **Chunk**: can't get object attributes
- 79 **Chunk**: can't get value of destination container
- 80 **Chunk**: can't get number
- 81 **Chunk**: can't get source string
- 82 **Chunk**: can't get substring
- 83 **Chunk**: can't find substring
- 84 **Chunk**: can't set attributes
- 85 **Chunk**: can't store to destination container
- 86 **Chunk**: can't set as a number
- 87 **Chunk**: can't find background
- 88 **Chunk**: can't find card
- 89 **Chunk**: no such object
- 90 **Chunk**: can't set property
- 91 **Chunk**: can't find stack
- 92 **Chunk**: no target found
- 93 **Chunk**: can't select object that isn't open
- 94 **Chunk**: source is not a container
- 95 **Chunk**: can't find object to store into
- 96 **Chunk**: can't get source from container
- 97 **Chunk**: destination is not a container
- 98 **click**: script aborted
- 99 **click**: expression is not a button number
- 100 **click**: error in point expression
- 101 **click**: expression is not a point
- 102 **click**: stack is not open
- 103 **clone**: error in name expression
- 104 **clone**: can't clone this object
- 105 **clone**: stack is locked
- 106 **clone**: can't find object to clone

- 107 **close**: error in name expression
- 108 **close**: can't find stack
- 109 **color**: error setting selectedColor
- 110 **compact**: can't find stack to save
- 111 **compact**: object is not a stack
- 112 **compound**: error in periods expression
- 113 **compound**: error in rate expression
- 114 **compress**: error in source expression
- 115 **compress**: error occurred during compression
- 116 **Operators &&**: &&: error in left operand
- 117 **Operators &&**: &&: error in right operand
- 118 **Operators &**: &: error in left operand
- 119 **Operators &**: &: error in right operand
- 120 **Operators contains**: contains: error in left operand
- 121 **Operators contains**: contains: error in right operand
- 122 **convert**: can't read from container
- 123 **convert**: can't set container
- 124 **copy**: invalid destination object
- 125 **copy**: can't find destination object
- 126 **copy**: can't copy source object
- 127 **copy**: can't find source object
- 128 **copy**: stack is password protected
- 129 **cos**: error in source expression
- 130 **cos**: domain error
- 131 **create**: error in bad parent or background expression
- 132 **create**: error in name expression
- 133 **create**: error in file name expression
- 134 **create**: stack is locked (cantModify)
- 135 **crop**: error in image expression
- 136 **crop**: object is not an image
- 137 **crop**: error in rectangle expression
- 138 **crop**: expression is not a rectangle
- 139 **cut**: can't find or copy object
- 140 **decompress**: error in source expression
- 141 **decompress**: string is not compressed data
- 142 **decompress**: error during decompression
- 143 **delete**: error in file or url name expression
- 144 **delete**: can't find object

- 145 **disable**: can't find object

- 146 **Stack**: stack has not been given a file name

- 147 **divide**: error in matrix operation

- 148 **divide**: destination has a bad format (numeric?)

- 149 **divide**: error in source expression

- 150 **divide**: can't set destination

- 151 **divide**: can't divide scalar by array

- 152 **divide**: range error (overflow)

- 153 **divide**: divide by zero

- 154 **Operators div**: div: error in matrix operation

- 155 **Operators div**: div: error in left operand

- 156 **Operators div**: div: error in right operand

- 157 **Operators div**: div: can't divide scalar by matrix

- 158 **Operators div**: div: range error (overflow)

- 159 **Operators div**: div: divide by zero

- 160 **do**: aborted

- 161 **do**: error in source expression

- 162 **do**: error in statement

- 163 **do**: error in expression

- 164 **do**: error in language expression

- 165 **do**: unexpected end of line in source expression

- 166 **do**: can't find command

- 167 **do**: not a command

- 168 **do**: license limit exceeded

- 169 **doMenu**: error in expression

- 170 **doMenu**: don't know this menu item

- 171 **drag**: script aborted

- 172 **drag**: bad "button" number

- 173 **drag**: bad end point expression

- 174 **drag**: end point is not a point

- 175 **drag**: bad start point expression

- 176 **drag**: start point is not a point

- 177 **driverNames**: error in type expression

- 178 **drives**: error in type expression

- 179 **edit**: can't find object

- 180 **encrypt**: error in source expression

- 181 **Operators =**: =: error in operand

- 182 **exp10**: error in source expression

- 183 **exp10**: domain error
- 184 **exp1**: error in source expression
- 185 **exp1**: domain error
- 186 **exp2**: error in source expression
- 187 **exp2**: domain error
- 188 **export**: error in file (or mask file) name expression
- 189 **export**: can't open file (or mask file)
- 190 **export**: can't write to file, mask file, or container
- 191 **export**: no image selected, or image not open
- 192 **export**: selected object is not an image
- 193 **Expression**: error in numeric factor
- 194 **Expression**: error in string factor
- 195 **exp**: error in source expression
- 196 **exp**: domain error
- 197 **extents**: error in variable expression
- 198 **Factor**: error in left operand
- 199 **Factor**: error in right operand
- 200 **Field**: bad text attributes
- 201 **Field**: hilitedLine is not an integer
- 202 **Field**: scrollbarWidth is not an integer
- 203 **Field**: shift is not an integer
- 204 **Field**: tabstops is not a positive integer
- 205 **files**: no permission to list files or directories
- 206 **filter**: bad source string
- 207 **filter**: bad pattern string
- 208 **filter**: can't set destination
- 209 **find**: bad source string
- 210 **flip**: can't find image
- 211 **flip**: object is not an editable image
- 212 **flushEvents**: bad event type
- 213 **focus**: not a valid control
- 214 **fontNames**: error in type expression
- 215 **fontSizes**: bad font name
- 216 **fontStyles**: bad font name
- 217 **fontStyles**: bad font size
- 218 **format**: bad format string or parameter mismatch
- 219 **Function**: error in function handler
- 220 **Function**: error in source expression

- 221 **Function**: source is not a number
- 222 **Function**: is not a number
- 223 **get**: error in expression
- 224 **get**: can't set destination
- 225 **globalLoc**: coordinate is not a point
- 226 **go**: error in background expression
- 227 **go**: error in card expression
- 228 **go**: error in stack expression
- 229 **go**: error in window expression
- 230 **go**: can't attach menu to this object type
- 231 **go**: can't find destination
- 232 **grab**: can't find object
- 233 **graphic**: not an integer
- 234 **Operators >=**: >=: error in operands
- 235 **Operators >**: >: error in operands
- 236 **Group**: backSize is not a point
- 237 **Group**: hilitedButton is not an integer
- 238 **Group**: bad object type
- 239 **Operators ()**: (): error in right operand
- 240 **Handler**: aborted
- 241 **Handler**: error in statement
- 242 **Handler**: error in parameter expression
- 243 **Handler**: not a valid parameter index
- 244 **hasMemory**: bad amount expression
- 245 **hide**: error in visual effect expression
- 246 **hide**: can't find object
- 247 **hostAddress**: error in socket expression
- 248 **hostAddressToName**: error in address expression
- 249 **hostName**: error in name expression
- 250 **hostNameToAddress**: error in name expression
- 251 **if-then**: aborted
- 252 **if-then**: error in condition expression
- 253 **if-then**: error in statement
- 254 **Image**: bad pixmap id
- 255 **Image**: hotspot is not an integer
- 256 **Image**: id is not an integer
- 257 **Image**: id is already in use by another object
- 258 **Image**: image must be open to set id

- 259 **Image**: hotSpot x is not an integer
- 260 **Image**: hotSpot y is not an integer
- 261 **import**: error in expression
- 262 **import**: can't open file, mask file or display
- 263 **import**: can't read file, mask file or display
- 264 **import**: destination stack is locked (cantModify)
- 265 **insert**: can't find object
- 266 **insert**: license limit exceeded
- 267 **intersect**: two objects required
- 268 **Operators is**: is: error in left operand
- 269 **Operators is**: is: error in right operand
- 270 **Operators is**: is: can't compare operands
- 271 **Operators is**: is: left operand of 'within' is not a point
- 272 **Operators is**: is: right operand of 'within' is not a rectangle
- 273 **isNumber**: error in source expression
- 274 **isoToMac**: error source expression
- 275 **Operators ,:** ,: error in left operand
- 276 **Operators ,:** ,: error in right operand
- 277 **keys**: parameter is not a variable
- 278 **kill**: no such process
- 279 **kill**: bad number
- 280 **launch**: error in application expression
- 281 **length**: error in source expression
- 282 **Operators <=**: <=: error in operands
- 283 **Operators <**: <: error in operands
- 284 **ln1**: error in source expression
- 285 **ln1**: domain error
- 286 **ln**: error in source expression
- 287 **ln**: domain error
- 288 **load**: error in url expression
- 289 **load**: error in message expression
- 290 **localLoc**: coordinate is not a point
- 291 **log10**: error in source expression
- 292 **log10**: domain error
- 293 **log2**: error in source expression
- 294 **log2**: domain error
- 295 **longFilePath**: error in file expression
- 296 **macToIso**: error source expression

- 297 **mark**: bad card expression
- 298 **mark**: error in find expression
- 299 **matchChunk**: can't set destination variable
- 300 **matchChunk**: bad or missing parameter
- 301 **matchChunk**: error in pattern expression
- 302 **matchChunk**: error in source expression
- 303 **matrix**: range error in matrix operation
- 304 **matrixMultiply**: error in source expression
- 305 **matrixMultiply**: can't multiply these arrays
- 306 **max**: error in source expression
- 307 **MCISendString**: error in source expression
- 308 **MD5digest**: error in source expression
- 309 **median**: error in source expression
- 310 **merge**: error in source expression
- 311 **Operators -**: -: can't subtract array from scalar
- 312 **Operators -**: -: error in left operand
- 313 **Operators -**: -: error in right operand
- 314 **Operators -**: -: range error (overflow) in array operation
- 315 **Operators -**: -: range error (overflow)
- 316 **min**: error in source expression
- 317 **Operators mod**: mod: error in matrix operation
- 318 **Operators mod**: mod: error in left operand
- 319 **Operators mod**: mod: error in right operand
- 320 **Operators mod**: mod: can't divide scalar by matrix
- 321 **Operators mod**: mod: range error (overflow)
- 322 **Operators mod**: mod: divide by zero
- 323 **mouse**: error in source expression
- 324 **move**: script aborted
- 325 **move**: can't find object
- 326 **move**: bad end point expression
- 327 **move**: bad duration expression
- 328 **move**: duration is not a number
- 329 **move**: end point is not a point
- 330 **move**: bad start point expression
- 331 **move**: start point is not a point
- 332 **multiply**: error in matrix operation
- 333 **multiply**: destination has a bad format (numeric?)
- 334 **multiply**: error in source expression

- 335 **multiply**: can't set destination
- 336 **multiply**: can't multiply scalar by array
- 337 **multiply**: range error (overflow)
- 338 **Operators <>**: <>: error in operands
- 339 **Operators not**: not: error in right operand
- 340 **Operators bitNot**: bitNot: error in right operand
- 341 **numToChar**: error in source expression
- 342 **Object**: bad textAlign expression
- 343 **Object**: unknown color
- 344 **Object**: error in colors
- 345 **Object**: can't set layer (card not open, or control in group)
- 346 **Object**: not a textStyle
- 347 **Object**: stack locked, or object's script is executing
- 348 **Object**: object does not have this property
- 349 **Object**: height is not an integer
- 350 **Object**: layer is not an integer
- 351 **Object**: margin is not an integer
- 352 **Object**: value is not a boolean (true or false)
- 353 **Object Name**: Name:
- 354 **Object**: property is not an integer
- 355 **Object**: coordinate is not a point
- 356 **Object**: rectangle does not have 4 points
- 357 **Object**: no Home stack
- 358 **Object**: pixel value is not an integer
- 359 **Object**: pixmap is not an integer
- 360 **Object**: can't set script while it is executing
- 361 **Object**: can't set this property
- 362 **Object**: textheight is not an integer
- 363 **Object**: textsize is not an integer
- 364 **offset**: error in start offset expression
- 365 **offset**: error in part expression
- 366 **offset**: error in whole expression
- 367 **open**: error in message expression
- 368 **open**: error in name expression
- 369 **open**: no permission to open files or processes
- 370 **Operators or**: or: error in left operand
- 371 **Operators or**: or: error in right operand
- 372 **Operators bitOr**: bitOr: error in left operand

- 373 **Operators bitOr**: bitOr: error in right operand
- 374 **Operators /**: /: error in matrix operation
- 375 **Operators /**: /: error in left operand
- 376 **Operators /**: /: error in right operand
- 377 **Operators /**: /: can't divide scalar by matrix
- 378 **Operators /**: /: range error (overflow)
- 379 **Operators /**: /: divide by zero
- 380 **param**: error in expression
- 381 **param**: bad parameter index
- 382 **param**: error in source expression
- 383 **param**: is not a number
- 384 **paste**: stack is locked (cantModify)
- 385 **peerAddress**: error in socket expression
- 386 **place**: group is not in this stack or is already on this card
- 387 **place**: can't find group
- 388 **place**: can't find card
- 389 **place**: source is not a group, or cannot be used as a background
- 390 **place**: destination is not a card
- 391 **play**: can't get sound or movie name
- 392 **play**: bad movie location
- 393 **play**: bad movie options
- 394 **Operators +**: +: error in left operand
- 395 **Operators +**: +: error in right operand
- 396 **Operators +**: +: range error (overflow)
- 397 **pop**: can't set destination
- 398 **post**: can't get source
- 399 **post**: can't get destination
- 400 **pow**: error in left operand
- 401 **pow**: error in right operand
- 402 **pow**: range error (overflow)
- 403 **print**: can't get 'from' or 'to' coordinates
- 404 **print**: can't get number of cards
- 405 **print**: can't get rectangle
- 406 **print**: error printing
- 407 **print**: error writing file (disk full?)
- 408 **print**: coordinate not a point
- 409 **print**: expression is not a rectangle
- 410 **print**: not a card

- 411 **print**: card or stack must be open to print it
- 412 **print**: no card specified
- 413 **arcAngle**: not an integer
- 414 **blinkRate**: not a number
- 415 **penColor**: bad color
- 416 **colormap**: bad color name or value
- 417 **Object**: error counting objects as number
- 418 **Object**: error counting objects as text
- 419 **dragSpeed**: not a number
- 420 **effectRate**: not a number
- 421 **extendKey**: not a number
- 422 **Property**: bad array expression
- 423 **gridSize**: not an integer
- 424 **idleRate**: not a number
- 425 **lineSize**: not an integer
- 426 **moveSpeed**: not a number
- 427 **multiSpace**: not a number
- 428 **polySides**: not an integer
- 429 **repeatDelay**: not a number
- 430 **repeatRate**: not a number
- 431 **doubleClickDelta**: not an integer
- 432 **doubleClickTime**: not a number
- 433 **roundRadius**: not an integer
- 434 **slices**: not an integer
- 435 **startAngle**: not an integer
- 436 **traceDelay**: not a number
- 437 **traceStack**: not a stack name
- 438 **print**: bad property value
- 439 **syncRate**: not a number
- 440 **tooltipDelay**: not a number
- 441 **typeRate**: not a number
- 442 **userLevel**: not an integer
- 443 **beep**: not an integer
- 444 **brush**: not an integer
- 445 **brush**: can't find image
- 446 **brushPattern**: not a valid image id
- 447 **brushPattern**: can't find image
- 448 **Object**: no object to set property

- 449 **Object**: can't set object property
- 450 **cursor**: not an integer
- 451 **cursor**: can't find image
- 452 **Property**: value is not a boolean ("true" or "false")
- 453 **Property**: value is not a number
- 454 **defaultStack**: can't find stack
- 455 **defaultMenuBar**: can't find group
- 456 **Object**: does not have this property
- 457 **Object**: property is not an integer
- 458 **penPattern**: not a valid image id
- 459 **penPattern**: can't find image
- 460 **randomSeed**: property is not an integer
- 461 **socketTimeout**: not a number
- 462 **umask**: property is not an integer
- 463 **push**: object is not a card
- 464 **push**: can't find card
- 465 **put**: error in expression
- 466 **put**: can't set destination
- 467 **put**: can't put into destination
- 468 **queryRegistry**: error in source expression
- 469 **random**: error in source expression
- 470 **read**: aborted
- 471 **read**: error in 'at' expression
- 472 **read**: error in condition expression
- 473 **read**: error in count expression
- 474 **read**: error reading
- 475 **read**: count is not an integer
- 476 **read**: error in 'until' expression
- 477 **read**: file is not open
- 478 **read**: error in 'for' expression
- 479 **read**: process is not open
- 480 **record**: error in file expression
- 481 **recordCompression**: type must be 4 characters
- 482 **recordInput**: type must be 4 characters
- 483 **remove**: can't find object
- 484 **remove**: object is not a group
- 485 **remove**: object is not a card
- 486 **rename**: error in source expression

- 487 **rename**: error in destination expression
- 488 **repeat**: aborted
- 489 **repeat**: error in 'for' condition expression
- 490 **repeat**: error in statement
- 491 **repeat**: error in 'until' condition expression
- 492 **repeat**: error in 'while' condition expression
- 493 **repeat**: error in 'with' end condition expression
- 494 **repeat**: error in 'with' start condition expression
- 495 **repeat**: error in 'with' step condition expression
- 496 **repeat**: error setting 'with' variable
- 497 **replace**: can't set container
- 498 **replace**: error in pattern expression
- 499 **replace**: error in replacement expression
- 500 **replace**: error in container expression
- 501 **replaceText**: bad parameter
- 502 **replaceText**: bad source string
- 503 **reply**: error in keyword expression
- 504 **reply**: error in message expression
- 505 **request**: error in keyword expression
- 506 **request**: error in message expression
- 507 **request**: error in program expression
- 508 **request**: no permission to request that
- 509 **getResources**: error in expression
- 510 **getResources**: no permission to get that
- 511 **return**: error in expression
- 512 **revert**: can't revert Home stack
- 513 **rotate**: error in object expression
- 514 **rotate**: object is not an editable image
- 515 **rotate**: error in angle expression
- 516 **round**: error in source or digit expression
- 517 **save**: error in file name expression
- 518 **save**: saving disabled
- 519 **save**: can't find stack to save
- 520 **save**: object is not a stack
- 521 **seek**: error in file name expression
- 522 **seek**: error in offset expression
- 523 **seek**: file is not open
- 524 **select**: can't select target

- 525 **selectedChunk**: error in button or field expression
- 526 **selectedButton**: bad family expression
- 527 **selectedButton**: bad parent object expression
- 528 **send**: error in message handler execution
- 529 **send**: error in message expression
- 530 **send**: error in 'in' expression
- 531 **send**: error in program expression
- 532 **send**: bad target expression
- 533 **send**: no permission to send that
- 534 **set**: error in source expression
- 535 **set**: can't set property
- 536 **setRegistry**: no permission to get or set registry
- 537 **setRegistry**: error in source expression
- 538 **shell**: aborted
- 539 **shell**: can't run shell command
- 540 **shell**: error in source expression
- 541 **shell**: no permission to run commands
- 542 **shortFilePath**: error in file expression
- 543 **show**: error in visual effect expression
- 544 **show**: error in location expression
- 545 **show**: error in number of cards expression
- 546 **show**: location is not in proper x,y form
- 547 **show**: can't find object
- 548 **sin**: error in source expression
- 549 **sin**: domain error
- 550 **sort**: can't find object to sort
- 551 **sort**: error sorting
- 552 **sort**: can't find field
- 553 **specialFolderPath**: error in type expression
- 554 **sqrt**: error in source expression
- 555 **sqrt**: domain error
- 556 **Stack**: bad decoration
- 557 **Stack**: invalid id (must be greater than current id)
- 558 **Stack**: invalid key
- 559 **Stack**: bad substack name
- 560 **Stack**: can't set mainStack (has substacks?)
- 561 **Stack**: deskIcon is not an integer
- 562 **Stack**: userLevel is not an integer

- 563 **Stack**: size is not an integer
- 564 **Stack**: stack is password protected
- 565 **Stack**: can't find mainStack
- 566 **Stack**: stack is not a mainStack
- 567 **Stack**: error in external function handler
- 568 **start**: can't find object
- 569 **start**: stack is locked
- 570 **start**: expression is not a group
- 571 **start**: license limit exceeded
- 572 **Handler**: error in source expression
- 573 **Handler**: can't find handler
- 574 **stdDev**: error in expression
- 575 **stop**: error in expression
- 576 **stop**: target is not a group
- 577 **subtract**: error in matrix operation
- 578 **subtract**: destination has a bad format (numeric?)
- 579 **subtract**: error in source expression
- 580 **subtract**: can't set destination
- 581 **subtract**: can't subtract array from scalar
- 582 **subwindow**: error in expression
- 583 **subwindow**: can't find stack or button
- 584 **sum**: error in source expression
- 585 **switch**: error in condition expression
- 586 **switch**: error in case expression
- 587 **switch**: error in statement
- 588 **textHeightSum**: can't find object
- 589 **tan**: error in source expression
- 590 **tan**: domain error
- 591 **there**: error in source expression
- 592 **throw**: error in source expression
- 593 **Operators \***: *: error in matrix operation
- 594 **Operators \***: *: error in left operand
- 595 **Operators \***: *: error in right operand
- 596 **Operators \***: *: range error (overflow)
- 597 **toLower**: error in source expression
- 598 **topStack**: error in source expression
- 599 **toUpper**: error in source expression
- 600 **transpose**: source is not a variable

- 601 **transpose**: can't transpose this array
- 602 **trunc**: error in source expression
- 603 **try**: error in statement
- 604 **type**: script aborted
- 605 **type**: bad string expression
- 606 **ungroup**: can't find group
- 607 **ungroup**: target is not a group
- 608 **uniDecode**: error in language expression
- 609 **uniDecode**: error in source expression
- 610 **uniEncode**: error in language expression
- 611 **uniEncode**: error in source expression
- 612 **unload**: error in url expression
- 613 **unlock**: expression is not a visual effect
- 614 **urlDecode**: error in source expression
- 615 **urlEncode**: error in source expression
- 616 **urlStatus**: error in url expression
- 617 **value**: error in source expression
- 618 **value**: error executing expression
- 619 **value**: can't find object
- 620 **Array**: bad index expression
- 621 **Chunk**: source is not a character
- 622 **Chunk**: source is not a number
- 623 **visual**: bad effect expression
- 624 **wait**: aborted
- 625 **wait**: error in expression
- 626 **wait**: expression is not a number
- 627 **within**: can't find control
- 628 **within**: not a point
- 629 **write**: error in expression
- 630 **Operators bitXor**: bitXor: error in left operand
- 631 **Operators bitXor**: bitXor: error in right operand
- 632 **Property stackFileVersion**: stackFileVersion: not a valid version
- 633 **Property stackFileVersion**: stackFileVersion: version not supported
- 634 **External handler**: handler: exception
- 635 **export**: Empty rectangle
- 636 **import**: Empty rectangle
- 637 **Property dragAction**: dragAction: Unknown action
- 638 **Property dragImageOffset**: dragImageOffset: Not a point

- 639 **Property dragDelta**: dragDelta: Not a number
- 640 **clipboard**: invalid mix of data types
- 641 **clipboard**: invalid text
- 642 **wrap**: bad array
- 643 **wrap**: illegal type for left operand
- 644 **wrap**: illegal type for right operand
- 645 **wrap**: type mismatch
- 646 **wrap**: overflow
- 647 **wrap**: division by zero
- 648 **begins/ends with**: with: illegal type for right operand
- 649 **begins/ends with**: with: illegal type for left operand

- 754 **lock**: bad rect expr
- 755 **lock**: not a rectangle
- 756 **field**: bad listStyle value
- 757 **field**: firstIndent must be an integer
- 758 **field**: leftIndent must be an integer
- 759 **field**: rightIndent must be an integer
- 760 **field**: spaceBefore must be an integer
- 761 **field**: spaceAfter must be an integer
- 762 **field**: listDepth must be an integer between 1 and 16.
- 763 **field**: borderWidth must be an integer
- 764 **field**: listIndent must be an integer
- 765 **field**: padding must be an integer
- 766 **Chunk**: can't store unicode to destination container
- 767 **relayer**: target not a container
- 768 **relayer**: couldn't resolve target object
- 769 **relayer**: couldn't resolve source control
- 770 **relayer**: source not a control
- 771 **relayer**: source and target not on the same card
- 772 **relayer**: layer not an integer
- 773 **relayer**: bad layer expression
- 774 **relayer**: target not a control
- 775 **relayer**: cannot move a control into a descendent
- 776 **relayer**: required objects disappeared while processing
- 777 **controlAtLoc**: location not a point
- 778 **do**: no caller
- 779 **read**: invalid command for datagram socket
- 780 **field**: listIndex must be an integer
- 781 **image cache limit**: cache limit: not a number
- 782 **controls don't have the same owner**: don't have the same owner
- 783 **uuid**: bad type expression
- 784 **uuid**: wrong number of arguments for specified type
- 785 **uuid**: unsupported type
- 786 **uuid**: bad namespace expression
- 787 **uuid**: namespace not a uuid
- 788 **uuid**: bad name expression
- 789 **uuid**: not enough randomness available
- 790 **avgDev**: error in source expression

- 791 **geometricMean**: error in source expression
- 792 **harmonicMean**: error in source expression
- 793 **pStdDev**: error in source expression
- 794 **pVariance**: error in source expression
- 795 **variance**: error in source expression
- 796 **group**: object cannot be grouped
- 797 **measureText**: no object
- 798 **font**: couldn't find font
- 799 **edit script**: script: bad at expression
- 800 **fullscreenmode**: not a valid mode
- 801 **Import**: no image selected, or image not open
- 802 **Resolve image**: image: error in source expression
- 803 **Internal BSDiff**: BSDiff: error in old file expression
- 804 **Internal BSDiff**: BSDiff: error in new file expression
- 805 **Internal BSDiff**: BSDiff: error in patch filename expression
- 806 **Internal Bootstrap**: Bootstrap: error in stack file
- 807 **IDE script configure**: script configure: error in settings expression
- 808 **IDE script replace**: script replace: error in text expression
- 809 **IDE script classify**: script classify: error in script expression
- 810 **IDE filter control**: filter control: error in pattern expression
- 811 **Engine PutInto**: PutInto: error in variable expression
- 812 **Engine DeleteVariableChunk**: DeleteVariableChunk: error in expression
- 813 **IDE Extract**: Extract: error in segment expression
- 814 **IDE Extract**: Extract: error in section name expression
- 815 **IDE Extract**: Extract: error in filename expression
- 816 **MCInternalPayloadPatch**: error in output filename expression
- 817 **MCInternalListTasksWithModule**: error in module expression
- 818 **MCInternalCanDeleteFile**: error in filename expression
- 819 **MCInternalCanDeleteKey**: error in key expression
- 820 **MCHandler**: error in expression
- 821 **textDecode**: bad data expression
- 822 **textDecode**: bad text encoding expression
