Find all controls in a group

```
on mouseUp
   put AllControlInGroup(grMyGroup,"graphic")
end mouseUp

function AllControlInGroup pGroup,pType
   put empty into rAllControlInCr
   repeat with i = 1 to the num of controls of group
pGroup
      put i & "," & the  name of control i of group
pGroup & "," & cr after rAllControlInCr
   end repeat
   delete char -1 of rAllControlInCd
   if pType <> empty then
      put "*" & pType & "*" into tFilter
      filter rAllControlInCr with tFilter
   end if
   return rAllControlInCr
end AllControlInGroup
```
